

Connecting to NoMachine

1. To use this you must first either be connected via the [webvpn](#) or connected directly to the SCHARP network.

2. If you have not yet downloaded and installed the NoMachine client please do so by following the directions bellow. Go to <http://www.nomachine.com/download.php> and scroll down to '**NX Client Products**'

Select the NX Client for Windows

Click Download Package.

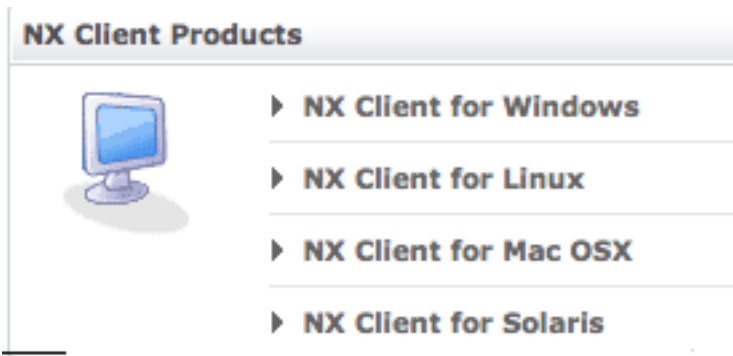

Open the folder where you saved the package

Double Click on the icon of the NX Client

Follow the NX Setup Wizard

Also click on the font options and install them the same way

Instructions can be found here <http://www.nomachine.com/documents/client/install.html#2.1>

3. Now that your NX client is fully installed, open your web browser and go to <http://admin-c.scharp.org/nxbuilder/ClientDownload.php>

Use the Drop down box marked as Display to choose the screen resolution you would like to work in.

Click on the linux icon under the Desktop heading.

Type in your CenterNet username and password and click Login
